Work Experience

Freelance Python Developer (Web Scraping & Automation)

📍 Remote

- Developed custom **web scraping solutions** using Requests, Beautiful Soup, Selenium, and Scrapy
- Extracted data from **static and dynamic (JavaScript-based) websites**
- Built automation scripts to eliminate repetitive tasks
- Delivered clean, structured datasets for business and personal use

---

Skills

💻 Programming & Tools

- Python (Requests, Beautiful Soup, Selenium, Scrapy)
- Git & GitHub
- Jupyter Notebook
- Markdown

⚙️ Web Scraping & Automation

- Static & Dynamic Website Scraping
- Browser Automation (Selenium)
- Data Extraction & Parsing
- Workflow Automation

📊 Data Handling

- Data Cleaning & Structuring
- CSV / Excel Data Processing

- Basic Data Analysis

🏆 Certifications

📜 Python Programming – [YouTube]
📜 Web Scraping & Automation – [Udemy]

📊 Projects

🌐 Web Scraping System

- Built scalable scrapers for extracting structured data from multiple websites
- Tools: Python, Scrapy, Selenium
- Outcome: Automated large-scale data collection

📦 Tracking Data Scraper (Real-Time)

- Developed a system to scrape and display tracking data from courier website
- Tools: Python, Requests, Beautiful Soup
- Outcome: Integrated with website for real-time tracking access

---

⚙️ Automation Scripts

- Created scripts to automate repetitive workflows and data collection
- Tools: Python
- Outcome: Reduced manual effort and improved efficiency

🌟 What Makes Me Different

- ☑ Strong focus on **automation and efficiency**
- ☑ Ability to handle **complex and dynamic websites**
- ☑ Clean, maintainable, production-ready code
- ☑ Practical, real-world problem-solving approach

🎯 Interests

🌐 Web Scraping & Automation
🤖 Smart Tools Development
💻 Freelancing & Remote Work
📚 Continuous Learning
